FIVE - Conclusion

- At this time, FIVE is overvalued with the P/E trading near the average high P/E. FIVE is an innovative, well managed company with good long-term prospects.
- Establishing a recommended buy below price is difficult with ranges from \$116 (5-year average P/E * TTM EPS) to \$96, depending on assumptions growth and future P/Es.
- FIVE is overvalued at this time, I would recommend add to Watch List.
- BUY on a significant dip. Place a limit order to purchase at \$100.
